Education

Northeastern University

Expected: May 2028

Candidate for Bachelor of Science in Computer Science and Business Administration, Minor Mathematics

Boston, MA

GPA: 3.89/4.0 | Dean's List Scholar

Courses: Foundations of Artificial Intelligence, Object-Oriented Design, Algorithms and Data, Foundations of Cybersecurity, Database Design, Foundations of Data Science, Discrete Structures, Accounting, Financial Management

Activities: TAMID at Northeastern; Code4Community (software consultancy); Forge (product development)

Work Experience

Sonos Inc.

Jun 2026 – Aug 2026

Incoming Software Engineering Intern, iOS team

Cambridge, MA

- incoming

Philips Healthcare

Jan 2026 – May 2026

Software Engineering Intern, Automation team

Cambridge, MA

- Will be working on Patient Monitoring System Software in C#, using the .NET framework, on the Automation Team, working on creating new microservices and automating deployment of existing microservices

Auribus Labs

Feb 2025 – Present

Software Engineering Intern (part time)

Boston, MA

- Building an FDA-compliant RX HealthCare App using **Swift** and **SwiftUI**, used by 60+ researchers at top institutions
- Spearheaded the creation of interactive hearing assessment modules featuring calibrated tone playback, achieving a 95% accuracy rate in preliminary diagnostic evaluations, as validated by senior engineering team
- Researched, developed and deployed a robust top of the funnel hearing test using **NextJs**, **TypeScript** and **Tailwind**

Venu AI

Apr 2025 – Jul 2025

Software Engineering Intern (part time)

Remote, Remote

- Designed and developed core CRM functionalities using **Django**, **React**, **PostgreSQL**, **Celery**, **Redis** and AI APIs
- Designed and coded scalable backend endpoints and **optimized database queries** to support high-volume client interactions, **improving endpoint efficiencies by up to 70%** and streamlining customer workflows
- Enhanced email client API integrations to reduce spam flagging and enhancing the client-facing UI for improved usability

Projects

Axiom AI | axiomai.space | [Source Code](#)

May 2025 - Present

- Created a platform focused on helping students with school work using **NodeJs** and **NextJS** and **Prisma ORM**
- Designed personalized learning platform leveraging **Google Calendar** and **Canvas LMS APIs**; enabled **automated schedule creation**, boosting **student assignment completion rates by 30%** within the first semester
- Pioneered an interactive educational platform with capabilities to **generate tailored videos, flashcards, and mindmaps**

Clash Royale AI Bot with Computer Vision | [Source Code](#)

October 2025 - November 2025

- Developed a reinforcement learning bot for Clash Royale using Q-learning with state-space discretization (early/mid/late game states), achieving autonomous gameplay through **PyAutoGUI** for real-time card placement and battle execution
- Built a **Q-learning agent** with epsilon-greedy exploration managing 144 discrete actions with adaptive learning rates
- Developed modular Python architecture separating core RL logic, computer vision perception, and battle management with robust error handling and fallback mechanisms for vision failures

Technical Skills

Languages: Python, Java, TypeScript, C#, SQL, C++, HTML5, CSS, Swift, Go

Developer Tools: AWS, GCP, Postman, Git, Docker, DataGrip, MySQLWorkbench, IntelliJ, VS Code

Libraries/Frameworks: ReactJS, PostgreSQL, .NET, Flask, NextJS, NodeJS, FastAPI, React Native, GraphQL, PyTest

Interests: Road Biking, Weight Lifting, Rubik's cubing, Clash Royale, Startups, Community Service
