Education

Northeastern University

Expected: Dec 2027

Bachelor of Science in Computer Science and Business Administration — Minor Mathematics

Boston, MA

- **GPA: 3.89/4.0 | Dean's List Scholar | American Citizen**
- Courses: Foundations of Artificial Intelligence, Object Oriented Design, Algorithms and Data, Financial Accounting, Financial Management, Foundations of Data Science, Discrete Structures, Database Design
- Involvements: TAMID at Northeastern; Code4Community (software consultancy); Forge (product development)

Work Experience

Philips

January 2026 - May 2026

Incoming Software Engineering Co-op

Cambridge, MA

Auribus Labs

Feb 2025 – Present

Software Engineering Intern

Boston, MA

- Building an FDA-compliant RX HealthCare App using **Swift** and **SwiftUI**, used by 60+ researchers at top institutions
- Spearheaded the creation of an **interactive hearing assessment modules** featuring calibrated tone playback, achieving a **95% accuracy rate** in preliminary diagnostic evaluations, as validated by senior engineering team
- Researched, developed and deployed an robust top of the funnel hearing test using *NextJs*, *TypeScript* and *Tailwind*

Venu AI (YC W21)

Apr 2025 – Jul 2025

Technical Product Management and Software Engineering Intern

Remote

- Engineered core features by designing and developing CRM tools using **Django**, **React**, **PostgreSQL** and AI APIs
- **Designed and coded scalable backend endpoints** and **optimized database queries** to support high-volume client interactions, **improving certain endpoint efficiencies by up to 70%** and streamlining customer workflows
- Led a team of 5+ interns, overseeing the development and deployment of 20+ features using **Azure**, **Celery**, and **Redis**
- Enhanced email client API integrations to reduce spam flagging and enhancing the client-facing UI for improved usability

Forge At Northeastern University

Jan 2025 – May 2025

Mobile Software Engineer and Software Team Lead

Boston, MA

- **Pioneered a React Native mobile application**, integrating Bluetooth Low Energy (BLE) to relay real-time posture data from a **custom Arduino Uno device**, enabling users to **visualize alignment metrics within 200ms latency**
- Architected **modular UI/UX components** and **state management** logic to support sensor feedback and live thresholds
- **Built BLE communication logic** for bi-directional data, flow enabling low-latency feedback and app enabled calibration

Projects

Axiom AI | [Website](#) | [Source Code](#)

NextJS | Node | Supabase | RAG

- Created a startup focused on helping students with school work using **NodeJs** and **NextJS** and **Prisma ORM**
- Designed personalized learning platform **leveraging Google Calendar and Canvas LMS APIs**; enabled **automated schedule creation**, boosting **student assignment completion rates by 30%** within the first semester
- Pioneered an interactive educational platform with capabilities to **generate tailored videos, flashcards, and mindmaps**

NUtrition | [Website](#) | [Source Code](#)

React | Webscraping | Selenium

- Created a **macronutrient tracker** for the Northeastern dining halls, helping provide users with insights about hall meals
- Built an **automated web scraper** for menus by using **Selenium WebDriver**, **Python**, **PyTest**, and **AWS Lambda**
- Architected a self-sustaining system to manage ingestion, processing, and display of data with minimal maintenance

Technical Skills

Languages: Python, Java, SQL, HTML5, CSS, JavaScript, TypeScript, Swift, Go

Developer Tools: AWS, Postman, Git, Docker, DataGrip, MySQLWorkbench, IntelliJ, VS Code

Libraries/Frameworks: ReactJS, PostgreSQL, Flask, NextJS, NodeJS, FastAPI, React Native, GraphQL, SwiftUI

Interests: Road Biking, Weight Lifting, Rubik's Cubing, Clash Royale, Startups, Community Service and Engagement
