Education

Northeastern University

Expected: Dec 2027

Candidate for Bachelor of Science in Computer Science and Business Administration, Minor Mathematics

Boston, MA

GPA: 3.89/4.0 | Dean's List Scholar

Courses: Foundations of Artificial Intelligence, Object-Oriented Design, Algorithms and Data, Foundations of Cybersecurity, Database Design, Foundations of Data Science, Discrete Structures, Accounting, Financial Management

Activities: TAMID at Northeastern; Code4Community (software consultancy); Forge (product development)

Work Experience

Philips Healthcare

Jan 2026 – May 2026

Incoming Software Engineering Intern (Winter/Spring 2026)

Cambridge, MA

- Will be working on Patient Monitoring System Software in C#, using the .NET framework, on the Automation Team

Auribus Labs

Feb 2025 – Present

Software Engineering Intern

Boston, MA

- Building an FDA-compliant RX HealthCare App using **Swift** and **SwiftUI**, used by 60+ researchers at top institutions
- Spearheaded the creation of interactive hearing assessment modules featuring calibrated tone playback, achieving a 95% accuracy rate in preliminary diagnostic evaluations, as validated by senior engineering team
- Researched, developed and deployed a robust top of the funnel hearing test using **NextJs**, **TypeScript** and **Tailwind**

Venu AI, Software Startup

Apr 2025 – Jul 2025

TPM and Software Engineering Intern

Remote, Remote

- Designed and developed core CRM functionalities using **Django**, **React**, **PostgreSQL**, **Celery**, **Redis** and AI APIs
- Designed and coded scalable backend endpoints and **optimized database queries** to support high-volume client interactions, **improving endpoint efficiencies by up to 70%** and streamlining customer workflows
- Led a team of 5+ interns in an **agile environment**, overseeing the development and deployment of 20+ features
- Enhanced email client API integrations to reduce spam flagging and enhancing the client-facing UI for improved usability

Forge At Northeastern University

Sep 2024 – May 2025

Mobile Software Engineer and Software Team Lead

Boston, MA

- Pioneered a **React Native mobile application**, integrating Bluetooth Low Energy (BLE) to relay real-time posture data from a custom Arduino Uno device, enabling users to visualize alignment metrics within **200ms latency**
- Architected **modular UI/UX components** and **state management** logic to support sensor feedback and live thresholds
- Built **BLE communication logic** for bi-directional data, flow enabling low-latency feedback and app enabled calibration

Projects

Axiom AI | axiomai.space | [Source Code](#)

May 2025 - Present

- Created a platform focused on helping students with school work using **NodeJs** and **NextJS** and **Prisma ORM**
- Designed personalized learning platform leveraging **Google Calendar** and **Canvas LMS APIs**; enabled **automated schedule creation**, boosting **student assignment completion rates by 30%** within the first semester
- Pioneered an interactive educational platform with capabilities to **generate tailored videos, flashcards, and mindmaps**

NUTrition | nutrition-oasis.vercel.app | [Source Code](#)

Jan 2025 - April 2025

- Created a **macronutrient tracker** for the Northeastern dining halls, helping provide users with insights about hall meals
- Built an **automated web scraper** for menus by using **Selenium WebDriver**, **Python**, **PyTest**, and **AWS Lambda**
- Architected a self-sustaining system to manage ingestion, processing, and display of data with minimal maintenance

Technical Skills

Languages: Python, Java, TypeScript, C#, SQL, HTML5, CSS, Swift, Go

Developer Tools: AWS, GCP, Postman, Git, Docker, DataGrip, MySQLWorkbench, IntelliJ, VS Code

Libraries/Frameworks: ReactJS, PostgreSQL, .NET, Flask, NextJS, NodeJS, FastAPI, React Native, GraphQL, SwiftUI

Interests: Road Biking, Weight Lifting, Rubik's cubing, Clash Royale, Startups, Community Service
